

Project Evaluation Grid (Checklist)

Python Web Programming (Django) – 2025–2026

Tunisian Hope and Future for Children and Youth

Final Mark: 20 / 20

Student: _____

Date: 10/06/2026

Evaluator: Chaouki Bayoudhi (Instructor)

Band guide: E = exceeds expected level, G = meets expected level, F = partially meets level, I = major gaps. Tick one band per section, then record the numeric score (sub-criteria are listed inside each section row as detailed checkpoints).

#	Criterion and sub-criteria checkpoints	Wt.	E	G	F	I	Score
A	Problem framing, idea and social relevance • A1 Problem statement / task definition clarity (1.0) • A2 Pertinence, originality and innovation (1.0) • A3 Stakeholder value and ethics/data boundary (0.5)	2.5	☐ 2.5	☐ 1.75–2.25	☐ 1.25–1.5	☐ 0.0–1.0	_____
B	Architecture, engineering and best practices • B1 Application architecture and project structure (1.0) • B2 Code organization, modularity, maintainability (0.75) • B3 Quality/relevance of packages and frameworks (0.5) • B4 Modern Django and Python best practices (0.75) • B5 Scalability and extensibility (0.5)	3.5	☐ 3.5	☐ 2.5–3.25	☐ 1.75–2.25	☐ 0.0–1.5	_____
C	Implementation: backend, frontend and data • C1 Backend implementation quality (1.0) • C2 Database design and data modeling (1.0) • C3 Frontend implementation quality (0.75) • C4 UI/UX quality and visual design aesthetics (0.75) • C5 Responsiveness and accessibility (0.5)	4.0	☐ 4.0	☐ 3.0–3.75	☐ 2.0–2.75	☐ 0.0–1.75	_____
D	Correctness, reliability, testing and performance • D1 Correctness and completeness of execution (1.0) • D2 Error handling, robustness, failure recovery (0.75) • D3 Testing and validation strategy (0.75) • D4 Performance and optimization (0.5)	3.0	☐ 3.0	☐ 2.25–2.75	☐ 1.5–2.0	☐ 0.0–1.25	_____
E	Security, privacy and governance • E1 Security practices and validation mechanisms (1.0) • E2 Privacy, data protection, auditability, risk governance (1.0)	2.0	☐ 2.0	☐ 1.5–1.75	☐ 1.0–1.25	☐ 0.0–0.75	_____

#	Criterion and sub-criteria checkpoints	Wt.	E	G	F	I	Score
F	Reasoning, justifications, discussion and documentation • F1 Logic and thinking approach adopted to build the project (1.0) • F2 Justification of design and technical choices (1.0) • F3 Discussion and justifications — oral defense and Q&A (1.0) • F4 API design quality, if applicable (0.5) • F5 Documentation, code readability and deployment readiness (0.5) • F6 Advanced integration quality — GraphQL/gRPC, RAG/scraping, MCP/A2A/ACP/ANP (1.0)	5.0	[] 5.0	[] 3.75–4.75	[] 2.5–3.5	[] 0.0–2.25	_____
Total (before bonus)		20.0					_____

Final mark (/ 20): _____

Final recommendation:

Accepted

Accepted with minor improvements

Major revision needed

Evaluator signature: _____
